Subject: Passaic Removal Action schedule

Hi All.

So to follow-up on the lease signing announcement, I met with Tierra last week to go check out the new Upland Processing Facility (UPF). It's across the street from the Covanta incinerator. While I was there we worked out a broad outline of a draft schedule which I've attached below. Because of the delays in getting the lease signed we essentially had to split up the design documents and the work into an enclosure construction phase and the UPF construction phase. The enclosure phase will start first and as we get the sample results back from the UPF we will then move forward with that phase. The Community Health and Safety Plan will therefore also be revised in 2 steps. An interim version will be produced that will cover all the elements that need to be in place to start the enclosure construction and then a draft final version will be produced that will cover the operations of the whole project. I expect the interim version to be submitted next week, so when I get that I will share it with you.

Unfortunately, I'm not available to attend the May CAG meeting. So I am hoping that we can possibly schedule a smaller working meeting some time in May to address jobs status, changes due to the UPF change in location, outreach, and schedule. I'll be in touch when I have a better sense of next month's activities.

Thanks and feel free to call me if you have any questions,
Elizabeth
